SUMMARY

A highly motivated and detail-oriented web and software developer with knowledge in HTML, CSS, JAVASCRIPT, BOOTSTRAP, REACT and NODE.JS. Skilled in building responsive websites, developing user-friendly applications and creating efficient software solutions. Eager to apply problem-solving abilities, collaborate in dynamic teams and continuously learn new technologies.

PROJECTS

AC service and repair

Project Purpose: To create a simple website showcasing AC service and repair offerings.

Technologies Used: HTML, CSS ,JavaScript, ReactJs

The Services section is the main part of the AC Service and Repair website, where visitors can find detailed information about the available offerings. This section highlights various AC services, such as installation, repair, maintenance, and troubleshooting, tailored to meet both residential and commercial needs. Each service is explained clearly, helping customers understand the specific benefits and solutions provided. By organizing the services with brief descriptions and visual icons or images, this section makes it easy for users to identify the help they need, whether it's a routine tune-up or an emergency repair. The goal is to build trust and offer a seamless path for users to select and book the right service for their AC needs.
